

(We Don't Share Photos We Fame Them)

Social Networking is the Key to the Future. The fame App will lead a new generation of social networkers to allow them to become great entrepreneurs without them even knowing it. Becoming famous is not as hard as it was 10 years ago. Fame use to be an opportunity that only could be, given by big Hollywood executives, major record labels, and Coaches and Sport Scouts. However, what if you want to make your construction company famous; or make your High School dance Team famous an or maybe you want to make your famous blueberry pie actually famous worldwide that's why we developed The Fame App.

JOIN THE REVOLUTION

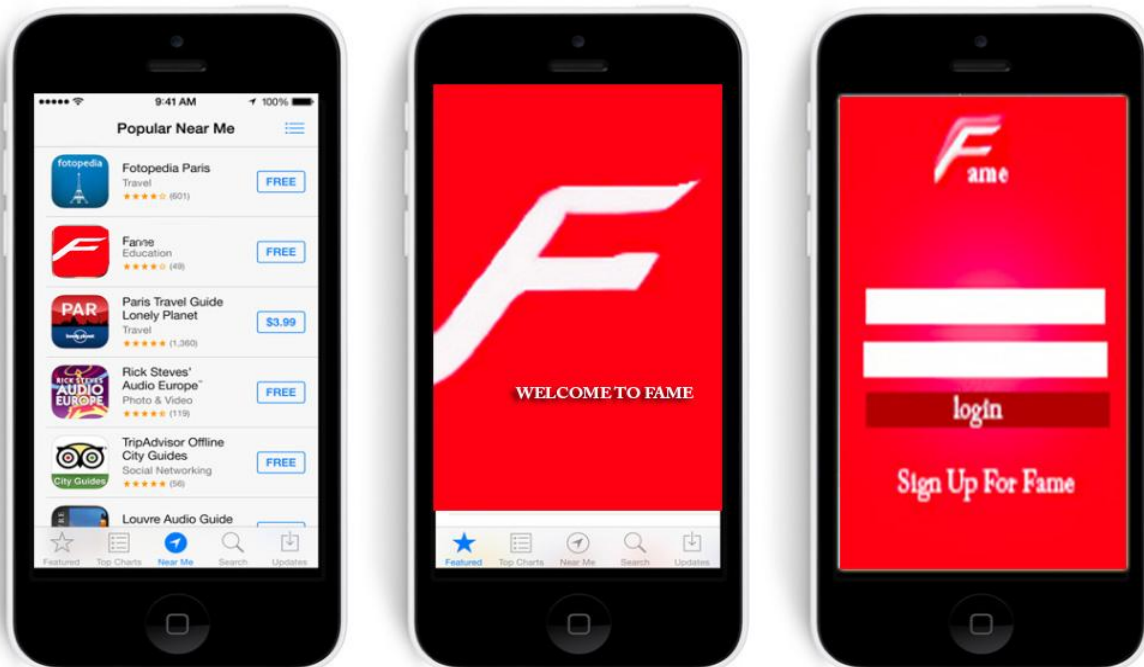

THE FAME APP

Fame It

The Fame App features allows its users to fame pictures & videos with a new layout of filters & effects that will be different and equik from others apps. Fame it is a new phrase we are using which means post to profile page and newsfeed when creating videos we are giving users 25 seconds of recording time, longer than either other social network app.

The best feature this app has is the Fame Live were you are able to fame/post a live video for your fans to see which will be 4 to 5 minutes long. One thing about the Fame Live feature is that the video will not post, on your profile or new feed; but instead automatically deleted itself.

FAME LIVE

If you ever watch live television in the era before DVR you know while watching our eyes are glued to the screen, prolonging bathroom breaks, not wanting to miss a second of entertainment because if you do miss something; you'll never get a chance to see it in real time again. That is the core strength of this App, when fans see in there notification that a users they love is about to go live on fame live so they will put off everything to insure they do not miss a second of it. In addition, we made Fame Live feel more personal because there are no second takes, if you do not like how you look or how you said something, you cannot change it, but sometimes that thing you do not like might also make you famous. This makes the experience more real and personal for all users.

On Fame, our users can also fame/post messages, which gives it that overall social network feel which and that will help our fame app not only be a one of the biggest applications but also last for generations to come. Now let me show how the fame app will generate revenue for all of us. Monetizing is the key, unlike any other application our app will advertise. When a user gains 10 fans we will send out an alert on their alert page congratulation them on their new fans with a sponsor add below which could range anywhere from Wal-Mart to headphones by Dre beats. I have already gather over 2,500 name, number, & emails from potential users who are interested and ready for the day the fame app is released. I estimate we will have over 5000 users sign up the first day and that is just by word of mouth. Every day we whether we know it or not we give free advertisement, we endorse product by telling the people around us or the people we meet about and how good a product is; which lead those people to try that product. With the use of the internet Fame when gain even more users which leads to more sponsors and more money.

What Fame Has To Offer

- Fame is much more than just another application is a way of life.
- Hope, aspiration, the joy of believing in one's self is what fame has to offer.
- Fame gives opportunities that could lead you or your product to become famous.
- Finally yet importantly, fame offer success, everybody just wants to be successful.

MONETIZING

We are revolutionizing the way social networks advertise\Monetize. The way we choose to monetize is on the user's alert page that will alert the users they have new fans with a paid ad below. This will never seem like a random pop up because it always has something to do with the user. Fame allows its users to make anything famous, nothing is excluded, fame something anything, for example a picture of your cafe or your son falling off his bike and when some else fame it meaning like your picture or video it post on their profile page. Understand that you are making yourself and or product famous by faming it.
